PROFILE

Hello there, I'm Shubham Raikwar, a full stack developer with two years of expertise who specialises in front-end and back-end development. I've demonstrated my ability to design and construct scalable online apps with ease, with a focus on React. My areas of expertise are website speed optimisation and the implementation of data scraping systems. I'm thrilled to contribute my skills, particularly in React, to assist your team thrive.

PROFESSIONAL EXPERIENCE

TechRitzy Pvt Ltd

FEB-2022 Present

Full Stack Developer

- Created React-based front end for Cloud Kitchen website, ensuring an intuitive user interface.
 - Reduced website loading time by **300ms** through comprehensive optimization strategies, enhancing overall user experience.
 - Contributed to the design and implementation of scalable web applications using **React, Python, and Flask**.
 - Managed databases, participated in schema design, and ensured tables normalization for optimal data organization.
 - Implemented **Python-based data scraping** solutions for Medicine & Healthcare websites and Books data, facilitating data-driven insights.
 - participated at every stage of the software development project's life cycle, which included design, development, testing, deployment, implementation, and support.
 - Deployed the application on **AWS EC2** with **Nginx**.
 - Utilized **Redux, Axios, Material UI** for robust functionality and using **JWT** for secure Authentication.
-

PERSONAL PROJECTS

- Cryptocurrency Web App: Developed a feature-rich web app for exploring top-100 trending coins with real-time charts.
 - E-commerce Vendors Management Web App (Flask): Created an efficient system using Flask to manage E-commerce vendors and optimize operations.
 - Web Scraping Projects: Successfully extracted data from various websites, demonstrating versatility in data scraping techniques.
 - Portfolio Website (React): Launched a personal portfolio website with React, visually presenting projects, skills, and achievements.
-

INTEREST

- Passionate about crafting compelling user experiences with React and front-end technologies for intuitive and visually appealing web applications.
-
